Profile

As a software engineer with over 4 years of experience developing web applications using tools like PHP and Laravel, I have a vast knowledge and expertise in web application development. I have worked on a variety of projects, ranging from small applications to large-scale enterprise projects.

I am a highly skilled and experienced professional in the use of PHP and Laravel, which allows me to work with best practices and modern software architectures and object-oriented programming approaches to create scalable and maintainable applications.

Employment History

Backend Developer, ScreenIt, Santiago de Querétaro

May 2022 — Present

- Development of an API to generate video interviews on-demand or in realtime, with the possibility of generating video-cv. This development was done with technologies such as PHP 8.1, Laravel 9, OpenVidu, Algolia, MySQL, Redis, Pusher, Mail Gun among others.
- I am in charge of the administration of the infrastructure of the collok.io platform, using technologies such as Digital Ocean, Docker, Circle-Ci, Bitbucket, etc.
- As part of my duties I also performed customer service.

Backend Developer, Rookmotion, Ciudad de México

September 2021 — April 2022

- Develop a RESTful API to create challenges and goals to add gamification to a fitness platform.
- I was in charge of giving corrective and preventive maintenance to the main API.
- Developed communication between microservices with AWS technologies.

Software Engineer, Gobierno de Zacatecas, Zacatecas

May 2019 — August 2021

- Developed there porting system for acts of corruption in the State of Zacatecas.
- Responsible for the implementation of the electronic signature for the platform from delivery to reception 2021.
- Developer of the platform for the Registry of Public Servants involved in Contracting Processes.
- Development of API for intercommunication with the State Anti-Corruption System.
